

FERNANDO BRANCO MORAES

Charlotte, NC • fernandobrancomoraes@gmail.com • (540) 824-8731 • linkedin.com/in/fernando-branco-moraes/

EDUCATION

Virginia Polytechnic Institute and State University - Blacksburg, VA
B.S. in Computer Science, Secure Computing Major, Human-Computer Interaction Minor
Cumulative GPA: 3.75 / 4.00

May 2025

PROFESSIONAL EXPERIENCE

Sales and Solutions Engineer, AccuKnox - Remote

Aug 2025 - Present

- Supported deployment and configuration of cloud and Kubernetes environments for enterprise customers, gathering technical requirements, validating integrations, and helping resolve environment issues during onboarding and production adoption
- Onboarded 50+ cloud environments across AWS, Azure, and GCP, assisting with cluster setup, infrastructure validation, and deployment readiness across Kubernetes and virtualized environments
- Built automation scripts, Helm upgrade workflows, and health checks to reduce deployment time from 3 hours to 1 hour and improve environment reliability

Cybersecurity Intern, Triple Point Security - Remote

June 2025 - Aug 2025

- Designed and implemented a multi-cloud networking architecture integrating two AWS VPCs and two Azure VNets, establishing site-to-site VPN connectivity between AWS and Azure, and configuring peering connections across all VPCs and VNets to enable secure, high-performance inter-cloud communication
- Installed and configured Uncomplicated Firewall (UFW) on Ubuntu VMs to block and unblock specific ports, IP ranges, and protocols, demonstrating control of incoming and outgoing traffic
- Wrote Terraform code to automate the deployment of AWS EC2 instances and S3 Buckets, and create VPCs in seconds, eliminating repetitive console clicks and minimizing time spent to create an instance

Solutions Engineer Trainee, AccuKnox - Remote

Dec 2024 - May 2025

- Delivered 100+ live technical demos to enterprise prospects in English, Spanish, and Portuguese, explaining Kubernetes, cloud security workflows, and deployment architectures, achieving a ~70% conversion rate to follow-up technical evaluations
- Recorded 15+ product tours demonstrating mitigation strategies for critical vulnerabilities (e.g., CVE-2024-4040), secret-exposure risks in K8s and code repositories, as well as compliance with AI governance frameworks

Undergraduate Research Assistant, Crowd Intelligence Lab - Blacksburg, VA

January 2025 - May 2025

- Built and integrated a Flask-based application to support AI-driven workflows, including data validation and system functionality for internal tooling
- Added validation and traceability features that documented system behavior, checked result integrity, and improved confidence in outputs

Software Engineering Intern, Arceum - Remote

May 2024 - August 2024

- Programmed a Lua-based matchmaker platform for swapping buy and sell limit orders on-chain, optimizing passive liquidity utilization
- Implemented 50+ automated test cases using Mocha and Chai to boost code coverage to 85% and platform reliability while authoring architecture and deployment documentation for future enhancements

PERSONAL PROJECTS

- Repurposed a legacy Intel Core i7 MacBook by installing Ubuntu 25.04, configuring it as a daily Linux workstation for terminal-based development, scripting, and experimentation with x86 system tools, networking utilities
- Developed a static HTML, CSS, and JavaScript website that simulates a UNIX terminal and has information about my background, experiences, and hobbies (<https://fernandobmoraes.github.io/>)

CAMPUS INVOLVEMENT

- Soccer Player, VT Men's Club Soccer:** Midfielder, reinforced teamwork, discipline, and rapid decision making

TECHNICAL SKILLS

Programming Languages: Python, Bash, Java, Lua, C, Swift

Skills: GCP, AWS, Azure, OCI, Kubernetes, Docker, Terraform, Linux, CI/CD, Networking, Scripting, Monitoring/Logging

CERTIFICATIONS

- AWS Certified Solutions Architect - Associate**

August 2025
